

Create a Kaggle Account

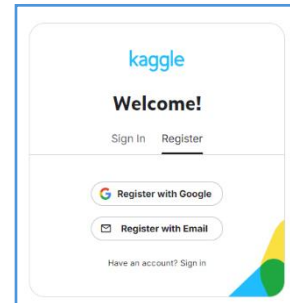

What is Kaggle? And why are we using it?

Kaggle is a widely recognised and respected platform for data science and machine learning enthusiasts, offering a plethora of datasets, competitions, and opportunities for collaboration. **Kaggle will be used in replacement of Jupyter Notebooks due to its computing resources.**

Step 1: Visit Kaggle's Website

Open your web browser and visit the Kaggle website (<https://www.kaggle.com>). On the landing page, you will find an option to sign in or register, click on "Register" to begin the account creation process.

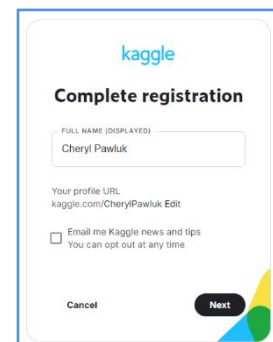

Step 2: Provide Basic Information

To create a Kaggle account, you will need to provide some basic information such as your full name, email address, and a password.

Step 3: Choose a Username

Selecting a suitable username is essential, as it will be your unique identifier on Kaggle.

Step 4: Agree to Terms and Conditions

Before proceeding, it's essential to read and agree to Kaggle's terms and conditions.

Step 5: Verify Your Email Address

Upon completing the registration form, Kaggle will send you an email with a verification link. Click on the link to verify your email address. This step is crucial as it confirms the authenticity of your account.

Step 6: Complete Your Profile

Once your email is verified, you will be redirected to your Kaggle dashboard.
